- Diabetes management – cholesterol
- Diabetes tests – foot examination
- Diabetes tests – microalbuminuria
- Diabetes management – blood pressure

Cardiovascular disease

- Blood pressure management
- Atrial fibrillation – prevention of stroke
- Identifying coronary heart disease

Cancer

- Cervical cancer screening
- Emergency cancer admissions

Mental Health

- Mental health – care plans
- Mental health – alcohol records

The data is aligned with the Organisation Data Service (ODS) and the Business Services Authority (BSA) so the identifier is the ODS code for the General practice.

How it is maintained:

The data is updated regularly, the frequency of which is individual to each indicator. This can be obtained by clicking on the 'i' button under the indicator name on the site.

Code formats:

ODS code format is used to identify the practice locations.

The character “-” has been used as delimiter on this file to factor in possible commas within cells.

File format:

Column	Field Content	Size	Mandatory	Notes
1	OrganisationID		Yes	Internal unique Identification.
2	OrganisationCode		Yes	General practice ODS Code.
3	OrganisationName		Yes	The General practice name for the site.
4	MetricName		Yes	The indicator name being displayed on the scorecard.
5	Value		No	The figure or data relevant to the General practice name listed.
6	Text		No	The data giving further meaning to the value displayed above.
